

Pact Website Services RFP Analysis

1. Executive Summary

What is the client trying to achieve?

Pact is seeking a qualified vendor to provide comprehensive website hosting, continuous optimization, security management, and ongoing technical maintenance and support for its primary corporate website.

What business problem are they solving?

The corporate website is a critical platform for communicating Pact's evidence-based impact across nearly 40 countries, attracting global talent, and engaging partners. Pact requires a reliable technical partner to eliminate infrastructure vulnerabilities, optimize accessibility, and ensure continuous platform availability so internal teams can focus on content and organizational objectives rather than technical operations.

What is the overall project objective?

To establish a five-year operational partnership that provides secure hosting, proactive monitoring, emergency support, accessibility compliance, and continuous website improvements that maintain a high-quality global digital presence.

2. Client Information

Organization Name: Pact, Inc. (Pact)

Industry/Domain: International Non-Governmental Organization (INGO) / Global Human Development

Background Information

Founded in 1971, Pact operates in nearly 40 countries and develops evidence-based, data-driven solutions for human development. The organization partners with local communities to build resilience, improve accountability, and strengthen local capacity through sustainable development initiatives.

3. Project Scope

Included Services

Website Hosting

- Website migration if necessary

- Secure cloud hosting environment
- Infrastructure management
- Performance monitoring

Maintenance and Support

- Core software updates
- Module and plugin updates
- Bug fixes
- Ongoing performance monitoring

Technical Optimization

- Site architecture improvements
- SEO optimization
- User experience enhancements
- Accessibility improvements

Emergency Support

- 24/7/365 monitoring
 - Incident response
 - Security breach remediation
 - Critical outage support
-

Expected Deliverables

Infrastructure Deliverables

- Secure isolated hosting environment
- Automated backup system
- Auto-renewing SSL certificates
- Disaster recovery capabilities

Reporting Deliverables

- Monthly performance reports
- Monthly security audit reports
- Monthly accessibility compliance reports

Support Deliverables

- SLA-based ticket resolution
 - Technical maintenance execution
 - Feature enhancements
 - Code updates and deployments
-

Explicit Exclusions

No specific exclusions are identified in the RFP. However, the scope focuses primarily on:

- Hosting
- Infrastructure management
- Security
- Maintenance
- Development support

Editorial content creation and day-to-day content management are not explicitly included.

4. Functional Requirements

User Experience and Design Improvements

- Ongoing usability enhancements
- Navigation optimization
- Layout improvements
- Analytics-driven UX recommendations

Search Engine Optimization (SEO)

- Metadata optimization
- Site architecture improvements
- Crawlability enhancements
- Search visibility improvements

Internal Search Management

- Search functionality maintenance
- Search performance optimization
- Search accuracy improvements

Accessibility Management

- Accessibility compliance monitoring
- Multi-device accessibility support
- Continuous remediation efforts

Emergency Response Capability

- 24/7 issue reporting channel
- Critical incident escalation process

- Engineering response workflows
-

5. Technical Requirements

Technology Requirements

Content Management System (CMS)

- Drupal-based environment (implied)
 - Existing enterprise CMS support
 - Ongoing module maintenance
-

Infrastructure and Hosting Requirements

Current Hosting Environment

- Pantheon

Hosting Requirements

- Isolated hosting environment
- Dedicated infrastructure
- No unrelated websites or applications hosted in the same environment

Datacenter Requirements

- Pact must have authority to select datacenter location

Administrative Access

- Full administrative access for designated Pact personnel
- Root-level access retention

Sustainability Requirements

Preference will be given to vendors utilizing:

- Sustainable cloud providers
 - Green energy initiatives
 - Environmentally responsible hosting practices
-

Integration Requirements

Support and maintenance of:

- Existing APIs
 - Google Analytics
 - Tracking pixels
 - Third-party integrations
 - Embedded scripts
-

Security Requirements

Security Controls

- Continuous monitoring
- Threat detection systems
- Unauthorized access prevention
- HTTPS enforcement

SSL Requirements

- Valid SSL certificates
- Auto-renewal functionality

Backup Requirements

- Automated backups
 - Disaster recovery procedures
 - Recovery testing and validation
-

Compliance Requirements

Accessibility Standard

WCAG 2.2 AA Compliance

Target accessibility score:

90+/100

Continuous monitoring and remediation are expected to maintain compliance.

6. Timeline and Milestones

Key Dates

Milestone	Date
RFP Issuance	June 17, 2024
Clarification Questions Due	June 28, 2024
Proposal Submission Deadline	July 8, 2024
Estimated Award Date	August 7, 2024

Project Duration

Anticipated Start

Immediately following contract award.

Contract Length

Five (5) years.

Estimated End Date

Approximately August 2029.

Go-Live

Not specified, as the website is already operational.

7. Budget and Commercial Information

Budget

No specific budget amount disclosed.

Pricing Expectations

Vendors must provide:

- Transparent pricing
- Itemized hosting costs
- Maintenance costs
- Development costs
- Hourly rate schedules

Cost Structure

Fixed Costs

- Hosting
- Monitoring tools
- Security services
- Infrastructure costs

Variable Costs

- Development support
 - Enhancement work
 - Consulting services
 - Additional engineering hours
-

Payment Terms

Expected reimbursement model includes:

- Monthly retainers
 - Milestone-based billing
 - Standard invoice reimbursement practices
-

Cost Constraints

Support Hours Policy

Unused support hours must:

- Roll over to future periods
 - Remain available for future use
-

Contract Duration

Five-year performance period.

8. Resource Requirements

Project Manager

Responsibilities:

- Project governance
 - Reporting
 - SLA management
 - Stakeholder communication
-

Business Analyst / UX Specialist

Responsibilities:

- Usability analysis
 - SEO assessments
 - User journey optimization
 - Analytics review
-

Frontend Developer

Responsibilities:

- Theme updates
 - Accessibility remediation
 - Layout modifications
 - UI enhancements
-

Backend Developer

Responsibilities:

- Core CMS updates
- Module maintenance

- Security patching
 - API maintenance
-

QA Engineer

Responsibilities:

- Cross-browser testing
 - Mobile testing
 - Regression testing
 - Release validation
-

DevOps Engineer

Responsibilities:

- Hosting management
 - Backup configuration
 - SSL administration
 - Threat monitoring
-

9. Risks and Challenges

Technical Risks

- Pantheon environment migration risks
 - Hosting transition challenges
 - Accessibility score achievement
 - Legacy code complexity
-

Timeline Risks

- Short proposal-to-award window
 - Accelerated onboarding requirements
-

Staffing Risks

- Maintaining 24/7 engineering coverage

- Meeting the 2-hour critical response SLA
-

Compliance Risks

- Falling below WCAG 2.2 AA requirements
 - Accessibility-related legal exposure
 - Brand reputation impact
-

Operational Risks

- Administrative access management
 - Production environment stability
 - Change management controls
-

10. Evaluation Criteria

100-Point Evaluation Matrix

Evaluation Area	Points
Responsiveness to RFP	15
Technical Approach	25
Cost / Budget	30
Management & Staffing	15
Past Experience	15
Total	100

Responsiveness to RFP (15 Points)

Evaluation of:

- Compliance with instructions
 - Formatting adherence
 - Page limits
 - Submission completeness
-

Technical Approach (25 Points)

Evaluation of:

- Hosting architecture
 - Maintenance methodology
 - Accessibility strategy
 - Security framework
 - Implementation feasibility
-

Cost / Budget (30 Points)

Evaluation of:

- Cost competitiveness
 - Value for money
 - Transparency
 - Budget realism
-

Management & Staffing (15 Points)

Evaluation of:

- Team qualifications
 - Certifications
 - Resource availability
 - Operational coverage
-

Past Experience (15 Points)

Evaluation of:

- Similar projects
 - Client references
 - Proven success
 - Relevant expertise
-

11. Proposal Submission Requirements

Technical Proposal

Maximum Length

8.5 pages

Required Sections

1. Attachment 1 Cover Page
2. Capability Statement (0.5 page)
3. Technical Approach (3 pages)
4. Activity/Implementation Plan (1 page)
5. Management & Staffing Plan (2 pages)
6. Past Experience & References (2 pages)

Cost Proposal

Requirements

- Separate file submission
- Detailed budget
- Hourly rates
- Cost breakdowns

No page limit specified.

Formatting Requirements

Requirement	Specification
Font	Times New Roman
Font Size	12 pt
Line Spacing	Single
Technical Proposal	Separate File
Cost Proposal	Separate File

Submission Method

Delivery Channel

Electronic email submission

Submission Email

icomms@pactworld.org

Reference Number

RFP No. 0031-2024-01

Required Company Information

The proposal cover page must include:

- Legal company name
 - Corporate address
 - Primary point of contact
 - Contact information
 - Unique Entity ID (UEI)
-

12. Information Useful for AI Agents

CEO Agent

Strategic Value

Winning this contract establishes a long-term relationship with a globally recognized international NGO and strengthens positioning within the nonprofit sector.

Key Win Themes

- Green cloud hosting
 - Accessibility excellence
 - Reliability and uptime
 - Security leadership
-

CTO Agent

Architecture Priorities

- High-availability infrastructure
- Isolated cloud environment
- Pantheon compatibility
- Automated CI/CD pipelines

Security Priorities

- Web Application Firewall (WAF)
- Real-time threat detection
- Multi-region backups
- Automated recovery testing

Accessibility Priorities

- Automated accessibility testing
 - Pre-deployment compliance checks
 - Continuous monitoring
-

PM Agent

SLA Requirements

Critical incidents must receive:

Response within 2 hours

Operational Planning

- Monthly maintenance backlog
 - Ticket prioritization
 - Rollover support hour management
-

CFO Agent

Commercial Strategy

Focus on:

- Competitive hosting rates
- Predictable support packages

- Clear pricing transparency
 - Sustainable profitability
-

HR Agent

Staffing Requirements

Ensure availability of:

- Drupal engineers
- DevOps specialists
- Accessibility experts
- On-call support personnel

Maintain updated CVs and staffing documentation for proposal inclusion.
